

Washington State Board of Nursing Nursing Assistant Training WABONNursingAssistantsED@doh.wa.gov

Nursing Assistant-Registered (NAR) Work Experience Verification of Clinical Hours and Competency

Qualifying Criteria

In accordance with <u>WAC 246-841A-440(8)</u>, Washington State Board of Nursing's (WABON's) procedures, and the training program's established policies, nursing assistant training programs retain the authority to allow students who choose to do so, on a case-by-case basis, to complete their clinical training hours by working as a nursing assistant-registered in a care facility under the supervision of a licensed nurse. To qualify for credit, the NAR work experience must:

- Be completed after successful completion of required classroom theory and skills lab hours;
- Be completed in a time frame comparable to that of classmates who complete through instructor-led clinical training as established by the program's schedule and completion policies (so there is close correlation between classroom/theory, skills lab, and clinical);
- Be performed under a pending or active nursing assistant-registered credential during enrollment in the class;
- Include a background check prior to contact with clients or residents;
- Occur in a care facility where a licensed nurse is present to provide direct supervision and verify competency for care provided continuously throughout the clinical experience; the supervising nurse may not be a friend or relative;
- Include opportunities for the student to successfully demonstrate the competencies of a nursing assistant as identified in <u>WAC 246-841A-400</u> for a minimum of 40 hours;
- Include care of clients or residents who are not friends or relatives;
- Be documented on a form provided by the commission and available on file at the training program along with formal documentation of the number of hours worked; and
- Be verifiable with the care facility. The program director is responsible to verify that each student's employment experience meets hours' requirements and all other qualifying standards included in WAC 246-841A-440.

Instructions

- The training program provides students who choose to work as NARs with this form and checklist. **Note:** The program must provide a traditional clinical rotation for students who do not choose to or are unable to work as NARs.
- The NAR works under a supervising licensed nurse who initials each skill for which the NAR demonstrates competency (corresponding to skills assigned to the NAR) (<u>Note</u>: the skills checklist must be complete or substantially complete to receive credit).
- The NAR provides a signed checklist to the training program and to the facility where they are working, and they keep a copy for themselves.
- The training program keeps this completed checklist in the student file in addition to the NAR's (student's) skills lab competency evaluation checklist form; to award credit, the program must have this completed checklist and formal documentation of at least 40 hours of work experience in the student's file (i.e., pay stub, letter from human resources, etc.)
- The facility where the NAR is working keeps a copy of the signed checklist in the NAR's file; this documentation may be requested during site surveys.
