Agency: Department of Health – Washington State Board of Nursing

Subject of possible rule making: Nursing Assistant (NA) skills testing, chapter 246-841A WAC. The Washington State Board of Nursing (board) is considering amendments and technical changes to existing rule sections and the establishment of new rule sections to implement skills testing by training programs.

Statutes authorizing the agency to adopt rules on this subject: RCW 18.88A.030, 18.88A.060, and 18.88A.087

Reasons why rules on this subject may be needed and what they might accomplish:

Nursing Assistant (NA) certification requires both a knowledge and skills examination. In 2023, the Washington State Board of Nursing (board) faced challenges with mass testing for NA certification, including limited testing availability and the need for students to travel further to access testing sites. To address these challenges, the board decided to transition to administering testing through nursing assistant training programs.

In October 2023, the board launched a voluntary training program testing initiative, allowing NA students to be tested through local training programs instead of centralized testing sites. NA skills testing, conducted by training programs, serves as a vital mechanism for offering convenient and localized testing opportunities to students and increased access to skills testing across the state. Presently, 88 out of 180 programs are administering skills tests to their own students. Since the transition, there has been an increase in testing capacity, with higher testing volumes and improved student confidence in familiar testing environments. Pass rates have also slightly increased, indicating the effectiveness of the new testing approach.

Additionally, the board will consider piloting a change where skills testing will occur as a component of NA training programs and students will participate in skills testing just prior to completion of their program. This change is expected to increase efficiency in the NA certification process. Establishing rules to formalize these changes to the skills testing process will clarify expectations of NA training programs around skills testing. Rules will help to ensure registered nurse (RN) evaluator training and competency, collection of pass rate and other testing data, compliance with federal testing requirements, and skills testing of nontraditional applicants at regional testing sites.

Identify other federal and state agencies that regulate this subject and the process coordinating the rule with these agencies: None

Process for developing new rule (check all that apply):

- Negotiated rule making
- Pilot rule making
- Agency study
- Other (describe) Collaborative rulemaking

Interested parties can participate in the decision to adopt the new rule and formulation of the proposed rule before publication by contacting:
